

City University CASE STUDY

Timescale

3 Weeks

Architect

Fraser Brown MacKenna Architects

Conducted under a framework agreement with City University, this project consisted of the strip out and removal of the existing reception area and the installation of a new concept desk. Produced in Corian using City University colours, the desk straddles an upstand beam which is integral to the structure of the building. Other works included new ceilings and lighting, floor finishes and interactive audio visual installations.
