## FORE STREET LIBRARY, EDMONTON

Vivid transformed an old video rental store into a community library for Enfield Council.

The existing premises were completely stripped out and fitted to a contemporary design with new flooring, ceilings, doors, windows and curved glass partitioning and balustrading. New mechanical and electrical services were installed throughout and bespoke joinery units used to house the mains electrics. The existing shopfront with automated doors were retained and refurbished.

New back-of-house facilities included staff areas, workrooms and store room.
